- Symfony
- CakePHP
- Dart
- PaymentLite
- ECCUBE
- React.js
- Node.js

EDUCATION

Far Eastern University – Cavite

BS in Information Technology

2017 – 2020

REFERENCE

Jerry Di Eugenio

Software Engineer

YNS Philippines Inc.

(+63) 9552757918

WORK EXPERIENCE

YNS Philippines Inc.

Software Engineer

July 2022 – Present

- Managed the creation of PBIs and task breakdowns
- Estimated story points, defined technical specifications, and delegated tasks to team members
- Handled multiple projects independently as a maintenance developer
- Facilitated Scrum meetings and guided the team
- Conducted code reviews for peers
- Tested development tasks to ensure quality and alignment with requirements
- Created and maintained sprint reports
- Deployed changes to test environments and released updates to production servers
- Performed server setup and maintenance
- Developed and tested features based on specific requirements
- Contributed as one of the two main developers and implemented ECCUBE for an e-commerce and restaurant reservation system.
- Took charge of key implementation and review tasks for an online pharmacy platform as the independent developer
- Initially contributed as a developer and later took on a lead role, actively working on core development and code review for an ongoing labor and material matching system with job posting, payments, material sharing, and community bulletin features

Technologies Used: Laravel, MySQL, Firebase, Laravel, Vue.js, jQuery, Symfony, CakePHP, React.js, Node.js, PHPUnit, Docker, Postman, Git, Bitbucket, GitHub, Amazon Web Services (AWS), Bootstrap, Inertia.js, Stripe API, Epsilon, PaymentLite, ECCUBE

Junior Software Engineer

December 2021 – July 2022

- Collaborated with team members to analyze requirements and specifications
- Participates in Scrum meeting, sprint planning and team discussions
- Developed and tested features base on the specific requirements
- Utilizes PHPUnit to implement unit testing in all development tasks
- Analyzes business flow diagrams and system documentation
- Updated project specifications and PBIs
- Created test cases based on specifications and requirements
- Involved in implementing key features for a business matching platform and its supporting digital tools
- Participated in developing PDF processing logic and reviewing code for an e-commerce website
- Contributed to building core features and reviewing code for a garbage collection and truck dispatch management system

Technologies Used: CakePHP, Laravel, jQuery, JavaScript, MySQL, Docker, VueJS, Stripe API, Bootstrap, PHPUnit, Bitbucket

Associate Software Engineer

July 2021 – December 2021

- Completed training and microblog presentation
- Handles bug fixes base on requirement and specification
- Maintained software applications
- Contributed to updating a legacy CakePHP system to its latest version as part of ongoing maintenance work

Technologies Used: CakePHP, Laravel, jQuery, Html, CSS, JavaScript, MySQL, Bitbucket
